Education

Arizona State University

Masters of Science in Software Engineering

Jan. 2025 – Dec 2026

Tempe, AZ

Jawaharlal Nehru Technological University

Bachelor of Science in Computer Science Engineering

Jul. 2018 – Jun 2022

Experience

DuPont

Software Developer – Data Services

August 2022 – August 2024

- Engineered scalable enterprise data pipelines using Python, PySpark, SQL, Azure Data Factory, Databricks, and Delta Lake to integrate SAP BW, SAP HANA, and MSSQL data into governed lakehouse datasets.
- Standardized access to 25 years of enterprise data by designing reusable ingestion, transformation, and data-modeling workflows that produced curated discovery-layer datasets for Power BI and Tableau reporting.
- Improved platform reliability by implementing pytest validation suites, Git-based development workflows, Azure DevOps CI/CD controls that detected Python, SQL, schema, and data-quality regressions before production deployment.
- Collaborated with engineering and analytics teams to translate business requirements into maintainable ETL/ELT components, reusable data interfaces, and production-ready datasets supporting cross-functional reporting and analytics.

DuPont

Software Developer Intern – Data Analytics

January 2022 – July 2022

- Developed self-service Power BI dashboards using DAX, Power Query/M, SQL, and Excel to transform enterprise data into governed KPIs and recurring operational reports for business stakeholders.
- Improved dashboard performance and analytical accuracy by refactoring Power Query transformations, semantic data models, calculated columns, and DAX measures across production reporting workflows.
- Gathered reporting requirements from business analysts and senior developers, translated stakeholder feedback into technical specifications, and delivered production-ready visualizations and data models.
- Validated report outputs, source-to-target mappings, and refresh workflows to improve data consistency, maintainability, and usability across recurring business-reporting cycles.

Projects

FocusFlow – LLM-Powered Agentic Nudging System | *Next.js, FastAPI, Supabase, GPT-4o-mini, Python* Spring 2026

- Engineered a two-stage AI application that separated passive behavioral detection from LLM-based nudge generation using FastAPI, Next.js, Supabase, and GPT-4o-mini.
- Designed a privacy-bounded 11-field JSON context contract and structured-output workflow to generate personalized responses while limiting unnecessary user-data exposure.
- Implemented graceful API-failure handling and modular service boundaries to improve reliability and simplify future platform integration.
- Validated the system in a 26-participant study, achieving 56% user preference, a 4.56/5 personalization score, and a 57.4% engagement rate.

FDA Recall Severity Classifier | *Python, scikit-learn, pandas, NumPy, openFDA API, Random Forest* Spring 2026

- Built an end-to-end machine-learning pipeline using approximately 45,000 harmonized openFDA enforcement records across food, drug, and medical-device domains.
- Engineered six cross-domain features and implemented standardized preprocessing, one-hot encoding, and an 80/20 stratified split to prevent data leakage.
- Trained and evaluated a 300-tree Random Forest model that achieved 86.8% accuracy, 0.741 macro-F1, and 0.937 precision for Class I recalls.
- Outperformed four logistic-regression baselines and validated three preregistered feature hypotheses through single and pairwise probability analysis.

Technical Skills

Languages: Python, SQL, PySpark, JavaScript, HTML/CSS, DAX, M Language

Frameworks & Libraries: FastAPI, React, Next.js, Node.js, Express.js, pandas, NumPy, scikit-learn, TensorFlow, OpenCV

Data & Cloud: Azure Data Factory, Azure Databricks, Delta Lake, PostgreSQL, MSSQL, MongoDB, SAP BW, SAP HANA, Power BI, Tableau, Supabase

DevOps & Tools: Git, GitHub, Azure DevOps, CI/CD, pytest, REST APIs, PowerShell, VS Code, Agile

AI & ML: OpenAI API, GPT-4o-mini, Prompt Engineering, Structured Outputs, LLM Evaluation, Random Forest, CNNs, Q-Learning, Feature Engineering, Model Evaluation
